Subject: Mendota Project - Revision to October 28 Meeting Notes
Attachments: 2021.10. 28 Rev 1 Meeting Notes MCNEP_CalGEM EPA Subsidence and Stimulation.pdf

Dear Colleagues,

We have a correction to our October 28 meeting notes in the subsidence section pertaining to well design:

The original statement was:

"MCNEP proposes to not cement the surface string; this is acceptable per EPA regulations"

The statement has been changed to:

*"MCNEP proposes to **not bring intermediate string cement above the surface casing shoe**; this is acceptable per EPA regulations"*

This statement is highlighted and tracked as a redline/strikeout in the revised notes (attached). Our apologies for any confusion.

Regarding documentation of subsidence in the vicinity of the project site, we look forward to receiving any data or information that CalGEM can share. Please let us know what works best for you in terms of data and information transfer.

Thanks and Best Regards,
Roya
